

## B 532/E

Technical Data Sheet

### ABS Resin

Sinkral® B 532/E is an extrusion ABS which exhibits a good balance between rigidity and toughness with a high impact resistance. Its rheological properties together with the excellent thermal stability facilitate the extrusion of both thin and thick sheets.

Designation: Thermoplastic ISO 2580-ABS 1,EGN,105-04-25-20

### Applications

Sinkral® B 532/E is widely used in the extrusion and co-extrusion of sheets with good surface finishing and high draw ratios.

This ABS is suitable in a large variety of sectors such as:

- refrigeration
- sanitary
- automotive
- packaging
- furnitures edgebands and surfaces.

### Typical processing data

Extrusion:

- if no venting, pre-drying required at 80°C for 2 - 4 hr in an air circulating oven
- melt temperature 190 - 230°C

### Certification

✓ UL 94   ✓ FMVSS 302

Sinkral® B 532/E, as supplied in the original packaging, by composition is compliant to some existing regulations on plastic materials intended for food contact.

### Storage

- ⚠ Store away from atmospheric agents and direct sunlight, away from sources of heat and light.
- 🕒 The product, if stored correctly, keeps its characteristics for at least fifteen months.

### General information

Sinkral® B 532/E is available in natural colour.
